

The MovieTech Mini Jib arm's use is very versatile. Heavy cameras can be operated very stable and sensitive. The weight balancing is accomplished via a crank fast and continuous. The length of the front arm is 83 cm/ 33 inch (from the column forward).

The Jib arm is equipped with a horizontal and vertical handbrake. The horizontal pan radius is 360°. Optional attachments and adapters allow further height, depth and side positions.

**Item.No. 2100-0** consisting of:

- Crane support with integrated brake
- Aluminum main segment
- Telescopic end segment
- Parallelogram rod with integrated vertical brake
- Euro mount at the jib end (may be installed on top or bottom)
- Counterweight rod (Item No. 2120-90)
- 2 main handle bars for steering

### The highlights at a glance:

- ▶ Continuous and very fast weight balancing via hand crank
- ▶ Equipped with a horizontal and vertical brake
- ▶ Via optional accessory parts and adapter further high, down and side positions may be reached
